Clients of Canine Biome & Enrichment Centre

SEPTEMBER 2026

I have worked and collaborated with Lynne since 2020 and was introduced to Alanna in 2022. I have had the opportunity to observe their work and can confidently say that they are deeply dedicated to promoting the health and welfare of animals. As a holistic veterinarian in Sarasota, I am dedicated to natural and holistic healing, used in conjunction with western modalities, to treat and care for canines and felines.

Lynne and Alanna have demonstrated in-depth knowledge of the gut microbiome, where 70% of the immune system is located. We all have the common goal of healing a pet rather than masking the symptoms with pharmaceuticals and producing a quick but oftentimes temporary remedy.

I would like to add that I share my clinical judgement with Lynne and Alanna when needed. While their recommendations do not replace formal veterinary care, they have strong canine acumen, insight and nutritional knowledge gained through extensive experience and coursework. Their background and history help ensure that their services are well-suited for your canine's health needs.

Live long and prosper!
